## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I in the response filed January 21, 2004 is acknowledged. Applicant has amended claim 23 to include the unifying concepts of Group I. In view of this amendment, the finding of lack of unity is withdrawn and the claims are rejoined and will be examined together. The examiner further acknowledges mono/oligosaccharides as the "R" species, as required in the previous Office action. However, given the lack of any non-variable core in Formula I, Applicant is required to select an m-valent unit, "X," to allow for the examiner to provide Applicant a comprehensive search. As Applicant notes, the claims are entitled to consideration of claims to additional species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
